

**IN A CLEAR ORGANIZATION YOU CAN SEE FAR INTO THE PRESENT**

## IT'S TIME FOR CLEAR COLLABORATION

Just as people can think with great clarity, so can organizations. It's time to build greater visibility, transparency, and accountability into the way your organization works.

Because being clear allows timely and relevant information to be available when and where it is needed: *get the right information to the right people at the right time*. Clarity demonstrates that your organization is willing and able to stay accountable to key stakeholders.

Clarity helps call out inefficiencies, reveal best practices, create credible sustainability, and give your organization the flexibility needed to anticipate and respond to a complex, ever-changing environment.

In order to succeed in today's environment, organizations need to change the way they collaborate by seeing, thinking and acting with increased clarity. Take the first step and begin your journey to a clear new organization.

CONGENIUM FOUNDATION (CF) can help every step of the way. From insight to action, CF solutions and services help you close the gap between strategy and execution, optimizing collaboration not only for your company, but for your entire network.

CF is an independent foundation funded under the premises of Swiss Civil Code as a foundation under private law and is a foundation registered in Switzerland.

CF was founded to promote information and communication technology (ICT) solutions to support good governance, foster democracy and strengthen human rights.

To achieve these goals CF distributes solutions which have been created by the Federal Department of Foreign Affairs of Switzerland and are in use every day in the Swiss Federal Administration.

CF has already helped the Swiss Federal Administration to become a clearer organization. Thanks to CF's solutions, the Swiss Federal Administration can benefit from:

**ALL INFORMATION** – Bring together all the information required for **superior decision making** and therefore accumulate a so called **intuitional memory** that boast **efficiency** (make it easy to find documents and relevant information).

**ALL PEOPLE** – Achieve **alignment across people**, teams, different government agencies and the ecosystem in order to **overcome “silo” structures** and **prevent redundant work** since people know what their colleagues are doing.

**FULL SIMPLICITY** – Gain **user acceptance** and **commitment** by providing simple solutions because besides the offered solution there are still other ways to collaborate such as using e-mail again.

**FULL SERVICE** – Facilitate users' tasks by offering **real supporting tools** that **lower administrative burdens** significantly for coordination, consultation and consolidation efforts.

**FULL ACCESS** – Espouse **“mobile” workers' demand** to be able to work wherever you would like or have to work by offering a web bases interface.

**FULL FLEXIBILITY** – Use **modularized** and **standard** architecture to enable greatest flexibility in order to meet further demands easily.

**FULL CONTROL** – **You are in the driver's seat:** have full control about who can see or do what and when. All modifications will be tracked. Review your progress, close strategy to execution gap.

**ONE PLATFORM** – Leverage **a single, integrated platform** for meeting collaboration needs, achieve significant **cost savings** by lowering maintenance.

By providing a platform for heterogeneous environments, a refined user experience for decision makers and mobile workers, CF delivers insight through a single, trusted platform and it redefines the way information empowers users.

CF platform breaks the barriers of traditional collaboration to ensure that all of your users – organizational-wide – have immediate access to reliable information – so they can do their jobs efficiently and effectively.

At CF, we believe collaboration is all about people. Our starting point is our desire to improve results for decision makers and to simplify collaboration for everybody involved.

One of the ways we can do this is through meaningful innovations, designed to make collaboration more effective and efficient.

And at CF, we know a thing or two about collaboration since we have already helped many organizations to improve collaboration.
